

Family Landing Page Naming & BAU Navigation

Usability Testing, Naming Study & Recommendations

Kristin Terpeza, VCG Content Strategy

2.13.2024

Research Objectives

Research objectives

Pt 1:

- a. Assess where the Family LP should be located within Verizon's BAU VCG global navigation.**
- b. Understand what navigational page names will resonate best with the target audience.**

Pt 2:

Further evaluate top-rated name options across a spectrum of personal interest in family products.

Methodology Overview

Pt 1 methodology overview: global nav location and naming preferences

Research Method

Remote usability testing

Unmoderated individual sessions

Prototype

Sample Size & Definition

50 Current Customers

50 Prospective Customers

All mobile account owners & decision makers

All current customers use MVA or MVO

Mix of ages, ethnicities, genders, and incomes

Pt 2 methodology overview: naming focused

A mix of Verizon mobile customers and non-Verizon customers evaluated the in-progress Family landing page and ranked proposed name options for overall fit and clarity. **Participants were asked to consider names in the context of on-page content and top-ranked nav placement from pt 1 usability testing.**

Research Method

Remote unmoderated survey-style
concept evaluation

Participants all evaluated a non clickable
prototype for the proposed Family LP and
answered a series of questions regarding the
purpose and page naming options

Sample Size & Definition

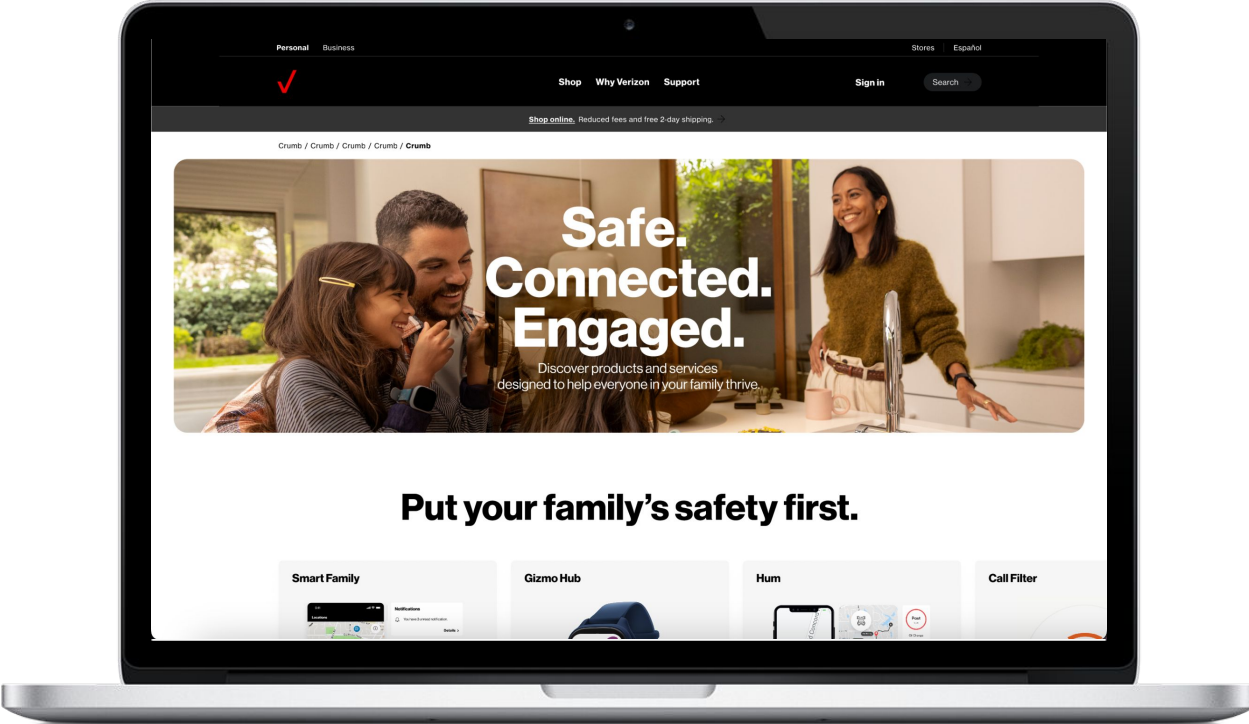

153 participants total
+ n = 112 Verizon customers
+ n = 41 non-Verizon customers

Mobile account owners or decision makers
Even mix of interest in family-focused products
(not interested – very interested)
Representative mix of demographics

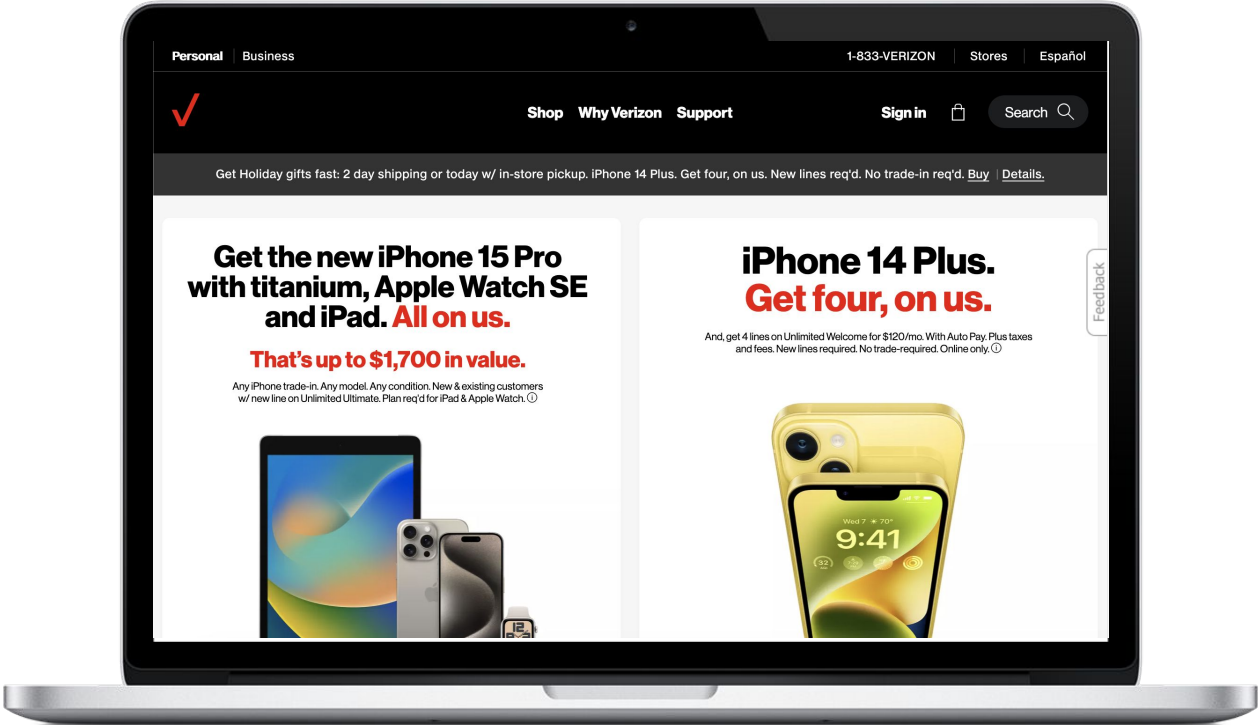

Study Set Up

Evaluated Stimuli: Family LP

Evaluated Stimuli: Verizon Website

Key Findings - Global Navigation Location

Pt 1: Over half of users felt that 'Shop' was the best category fit for the Family LP

57 users ranked 'Shop' as the #1 category to place the Family LP.

Only 16 users ranked 'Shop' as the #3 category to place the Family LP.

"Shop - first, simply because that's where customers look most. That's where I go first. Why Verizon - makes the most sense to me, but I never look there, so you'd need to make us aware."

"I believe the family focused page should mainly appear on the shop category because it would be a great way to advertise Family plans and see all offers relating to family."

34 users ranked 'Why Verizon?' as the #1 category to place the Family LP.

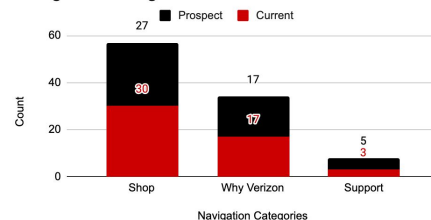

'Why Verizon?' was most commonly the second best place to place the Family LP.

"Why Verizon would be the best fit since the page is focused on all of the perks that come with the choosing the family plan with Verizon."

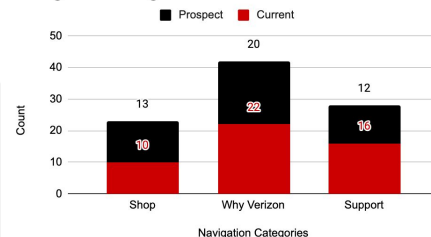

'Support' was not considered an appropriate category to house the Family LP

"Support - I only go there if I need help, but it is a solid option for security info."

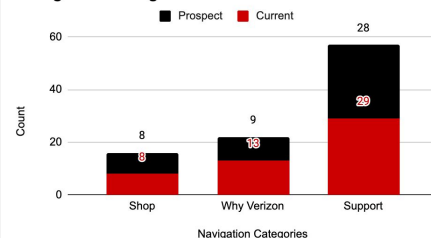

Navigation Categories Ranked #1 For Best Fit

Navigation Categories Ranked #2 For Best Fit

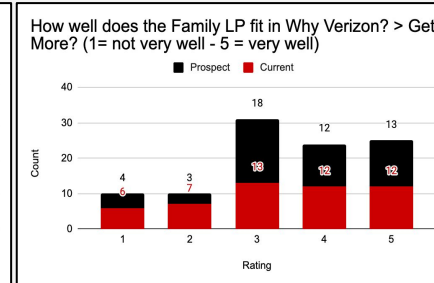

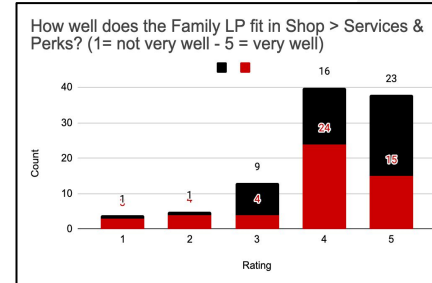

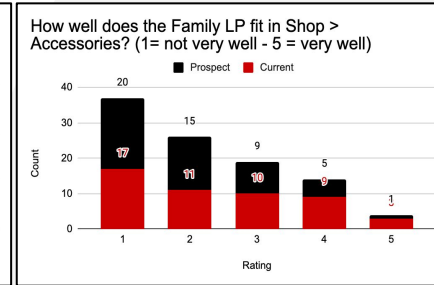

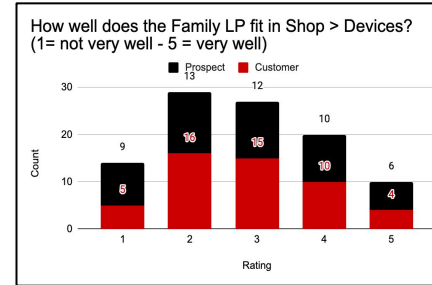

Navigation Categories Ranked #3 For Best Fit

Pt 1: Of hypothesized locations, users feel 'Shop > Services & Perks' fits best

'Services & Perks' ranked the highest, implying to users that it will showcase a range of services and products.

Though there are devices and accessories on the Family LP, users feel the 'Devices' and 'Accessories' subcategory do not fully encapsulate the range of products and services mentioned.

Key Findings - Naming

Pt 1: Naming to set expectations

Users gravitated towards titles that create the clearest picture of what they will see on the Family LP.

Family Safety, Connected Family, Family Products/ Services, and **Digital Family** paint a picture for users of the primary topics that stood out to them on the Family LP: safety/security, staying connected, and technology.

From these, we narrowed down options for Pt 2 name testing:

Connected Family, Family Products, and Digital Family

Pt 2: Naming for clarity and accuracy within preferred nav location

“Connected Family” best described the content of the Family landing page and is preferred by both Verizon customers and non-customers.

- + Participants appreciated the nod to family connection and safety evoked in the name “Connected Family” and found it to be an accurate representation of the products and content highlighted in the design.

- + While not emerging as the preferred name option by prospects and customers, “Family Products” and “Digital Family” were also top rated and both would still accurately represent the content on the Family landing page within the preferred navigation location.

For rank mean analysis data, refer Appendix > Full Studies > Pt 2 (slide 22)

SEO Recommendations

Naming with optimal ranking

“Digital Family” offers the best opportunity to rank for non-branded queries, in a less competitive search space.

- + “Connected Family” is close to “Connected Families,” which is an entire industry of parental coaching and workshops. Would be almost impossible to rank on the first page of search results for this query.
- + “Family Products” is too broad and overlaps with other companies’ products and services. We would also be in direct competition with Google and their families.google domain. Would be difficult to rank high for this query.

Naming with optimal ranking cont.

Additional key points to consider:

- + SEO advises against changing the URL from BAU/legacy <https://www.verizon.com/family-tech/>. As an already established page, changing the URL would be more likely to negatively impact traffic vs. boost it.

Note: For existing pages, URL doesn't have to be the same as a page anchor name in the navigation, as long as on-page content aligns.

- + SEO recommends page Metadata be updated to match recommended nav name of "Digital family."

Summarized Recommendations

Summarized Recommendations

VCG BAU Global Nav location: **Shop > Services & perks**

Page name: **Digital family**

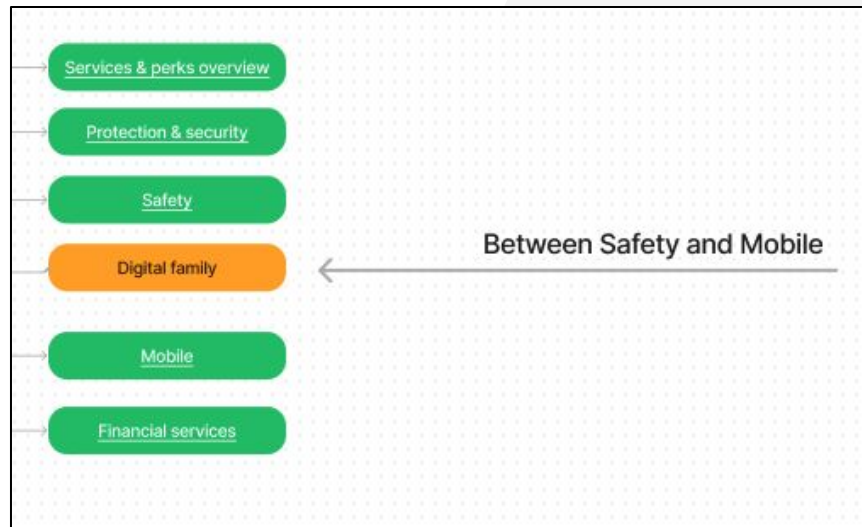

Suggested location within **Services & perks**:

URL: (unchanged)

<https://www.verizon.com/family-tech/>

Metadata: **Align with “Digital family”**

Breadcrumb: **Shop / Services & perks / Digital family**
