

Mobile Switcher Navigation & Naming

Usability Testing & Recommendations

Kristin Terpeza, VCG Content Strategy

07.29.2024

Research Objective

Objectives

Assess where the redesigned Mobile Switcher Landing Page should be located within Verizon's VCG global navigation; and what placement will resonate best with our target audiences thematically

Understand what page title will resonate best with the target audience

Research Method

Remote usability testing

Unmoderated individual sessions

Prototype

Sample Size & Definition

100 Prospective Customers

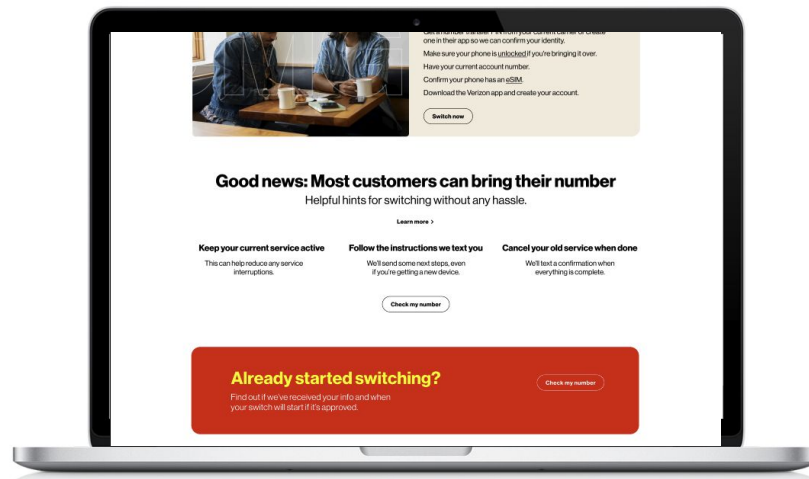

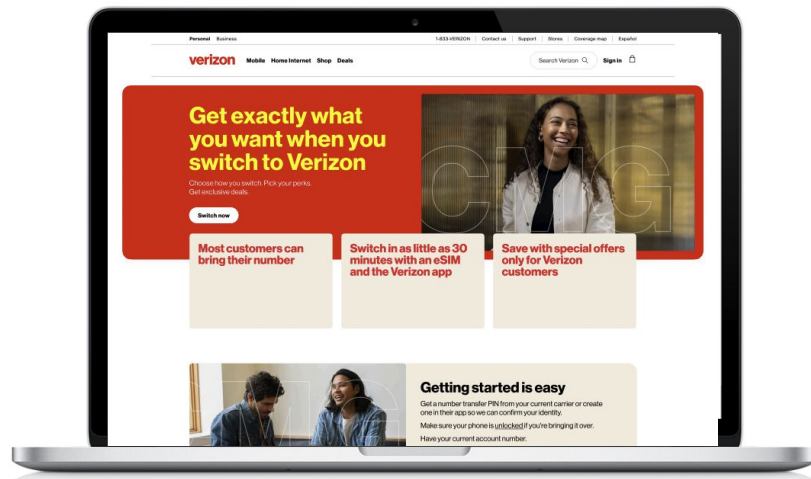

All mobile account owners & decision makers

Mix of ages, ethnicities, genders, and incomes

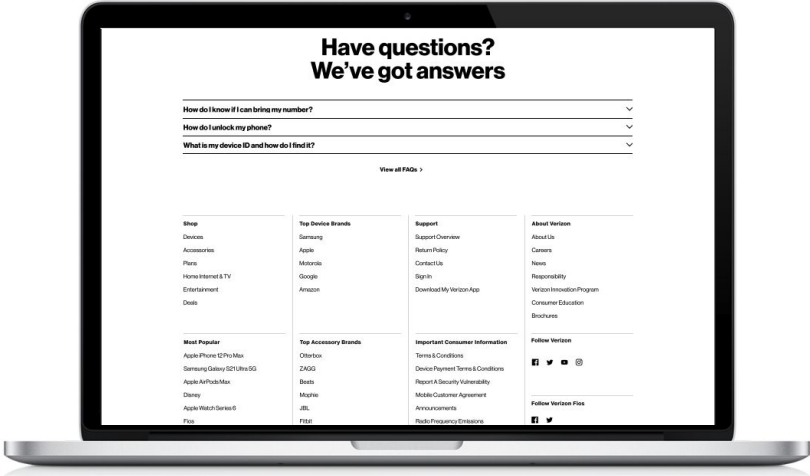

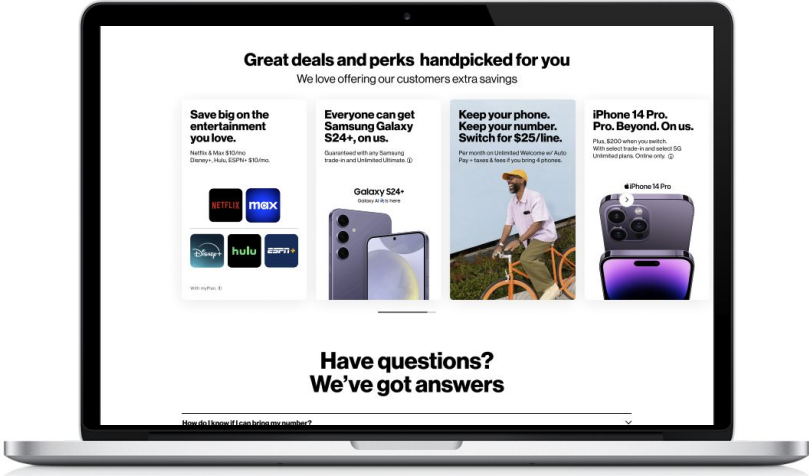

Study Set Up

Evaluated Stimuli: Mobile Switcher

Evaluated Stimuli: Mobile Switcher

Key Takeaways

Key Takeaways

1 **The majority of users preferred the name that offers the clearest picture of what they will find on the Mobile Switcher page.**

Users chose the title that told them what they'll be doing and where - Switch to Verizon

2 **User's intuition is to look for information on switching to Verizon on the 'Mobile' tab.**

Because the transaction involves a mobile phone, there is an assumption that the information will be under the 'Mobile' tab.

3 **When prompted to start in the 'Shop' tab, users thought several locations were appropriate next steps.**

From the 'Shop' Category, the next logical step for users is either 'Plans' or 'Deals'. However, many users mentioned having multiple locations makes the most sense.

Detailed Findings

Users' titles consist of keywords that reflect themes of switching and simplicity

Most included the word 'switch' or 'transfer' in the title

- + **Switching** 101, **Switch** Tips, **Switch** Services, **Switch** Phone Plans, **Transfer** Now, **Transfer** Your Number

Keeping your number was also a favorable feature mentioned in names

- + **Keep Your Number** and Switch, **BYON** (Bring Your Own Number), Maintain Your Number,

Many included *how* the switch would be to perform

- + Transfer to Verizon **Easily**, Switching Made **Easy**, **Simple** to Switch, Verizon the **Easy** Way. Switching made **Simple**, **Hassle-free** Switching, **Quick** Conversion

Some included benefits to switching

- + Switch Carriers and **get Deals** on Streaming, Everyday **Deals**, Switch and **Save**, **Perks** when Switching to Verizon, Verizon has **Perks**

Q: Please list up to three titles for this page to accurately describe what you can find or do here?

'Switch to Verizon' is the best name for users.

When presented with a list of names, most felt the title 'Switch to Verizon' best represents the purpose of the page.

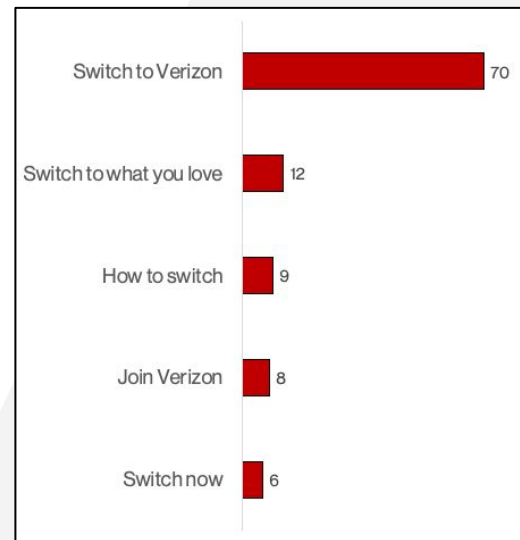

*"I find **switch to Verizon** to be the most **clear and concise**. It raises no questions and communicates what I need to know."*

*"Join implies you're starting a new service, vs **switching** makes it clear you're **transferring** and makes it obvious you're switching to, rather than away from, Verizon."*

*"I like it because it gives you the **impression you can carry over your original phone** information to a new carrier at Verizon."*

*"It makes the **most sense** and tells you that it is for **switching to Verizon**."*

Preferred Name

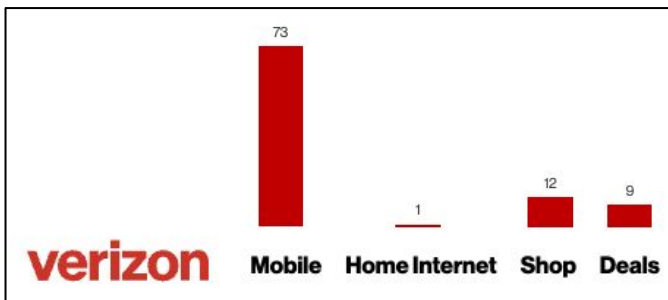

Q: Of the following names, which one would you choose to call this page?

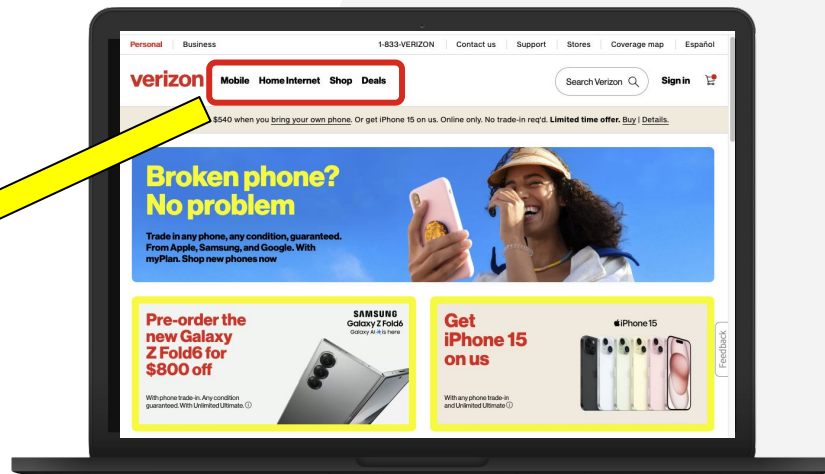

Most expected the Mobile Switcher to be located in the 'Mobile' tab

Prior to reviewing subcategories in the primary navigation, the majority of users (73) expected to find the Mobile Switcher within the 'Mobile' section, because it involves their mobile phone

- + 12 expected to find this page in the 'Shop' tab because that is where phones and plans are located
- + 9 expected to find it in the 'Deals' tab, while only 5 didn't expect the page to be a fit for any of the existing primary navigation categories

Q: Starting from the Verizon website's home page, where would you expect to begin if you needed to locate the page you reviewed in the first part of this study - information to switch to Verizon?

Of hypothesized locations, users feel 'Shop > Plans' fits best

'Shop > Plans' ranked the highest, with a little more than half of users scoring it a 5 (this IS a good location).

'Shop > Deals' ranked second, but users thought there were multiple locations that would be a good fit for this page:

- + **Shop > Plans** - Bring your own device
- + **Shop > Deals** - Smartphones, Bring your own device
- + **Shop > Devices** - Smartphones, Bring your own device, Trade in your device
- + **Shop > Services & Perks** - Mobile

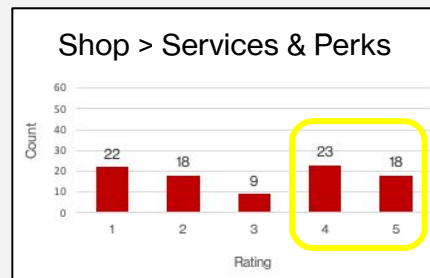

"Anywhere that says 'bring your own device,' because the two go hand-in-hand." (Scored 'Plans' a 5)

"If I'm going to switch, it has to be a really good reason. And a great deal is a good reason." (Scored 'Deals' a 5)

"Unless there was something that specifically said, 'switch your device,' I would go to 'Devices.'" (Scored 'Devices' a 5)

"Bringing your plan over, keeping your number ... those are all Services. And then everything else - saving on a plan, saving on streaming, those are all Perks." (Scored 'Services & Perks' a 5)

The best place to find information to switch to Verizon
1 = This is NOT a good place
5 = This is a good place

Q: Do you think the XXX tab is a good place to find the page to switch to Verizon?
1 = this is NOT a good location
5 = this IS a good location

Summarized Recommendations

Summarized Recommendation #1

VCG Global Nav location: **Mobile > Switch to Verizon**

Page name: **Switch to Verizon**

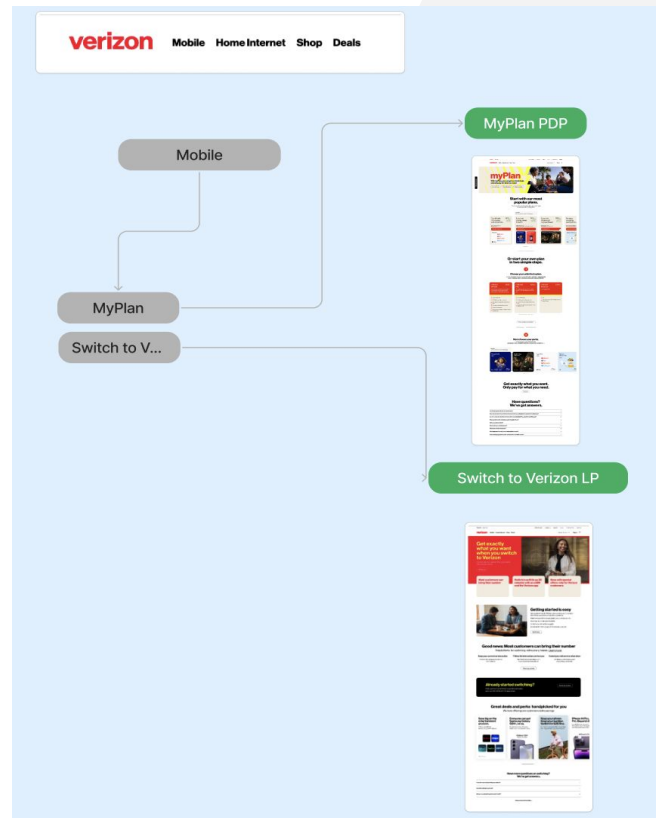

Suggested location within **Mobile**:

URL: (unchanged)

<https://www.verizon.com/switch-to-verizon/>

Metadata: **Aligned with “Switch to Verizon”**

Breadcrumb: **Mobile / Switch to Verizon**

Summarized Recommendation #2

VCG Global Nav location: **Shop > Plans > Switch to Verizon**

Page name: **Switch to Verizon**

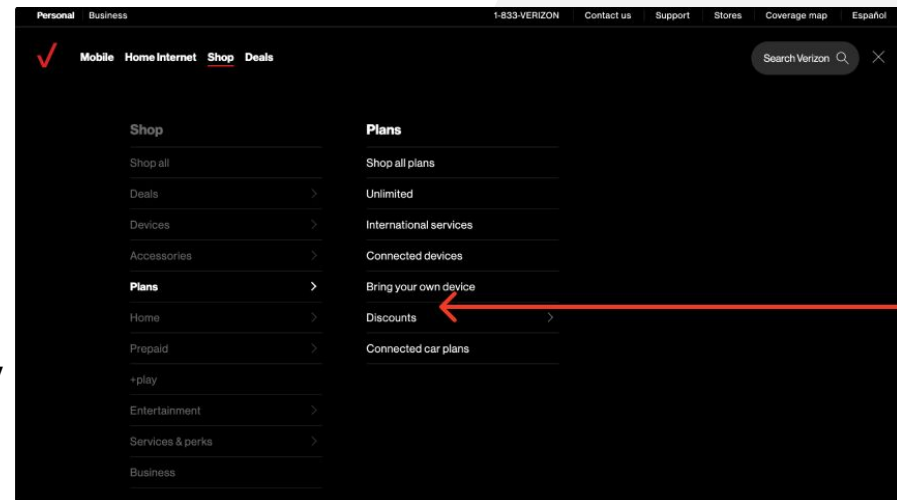

Suggested location within **Shop > Plans**:
Between “**BYOD**” and “**Discounts**”

URL: (unchanged)

<https://www.verizon.com/switch-to-verizon/>

Metadata: **Aligned with “Switch to Verizon”**

Breadcrumb: **Shop / Plans / Switch to Verizon**

Summarized Recommendation #2 Continued

Option to slot within multiple locations within Shop, **in addition to Shop > Plans:**

Page name for all: **Switch to Verizon**

Suggested additional locations:

Shop > Deals

Shop > Devices

Shop > Services & perks

URL for all: (unchanged)

<https://www.verizon.com/switch-to-verizon/>

Metadata for all: **Aligned with “Switch to Verizon”**

Review [Figjam Idea 2](#) for subnav locations for each & breadcrumbs

Summarized Recommendation #3 (not signed in only)

VCG Global Nav location: **L1 Switch to Verizon**
(becomes “Account” once signed in)

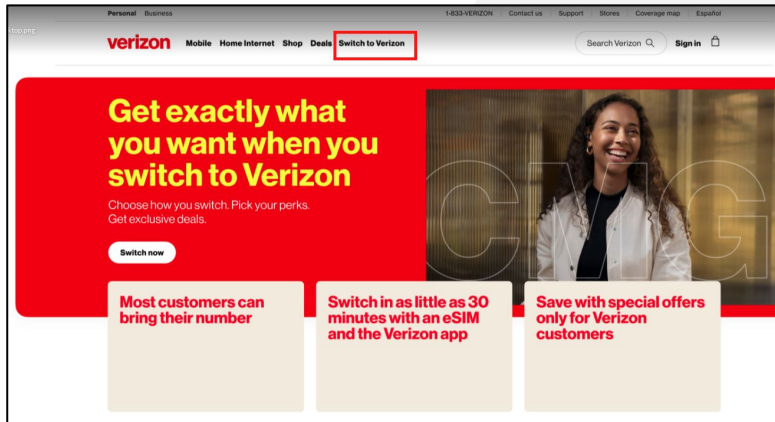

Page name: **Switch to Verizon**

URL: (unchanged)

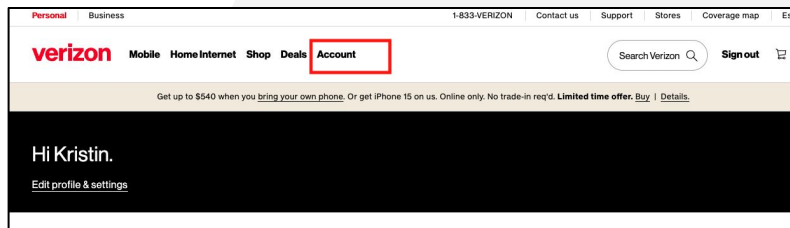

<https://www.verizon.com/switch-to-verizon/>

Metadata: **Aligned with “Switch to Verizon”**

Breadcrumb: **Switch to Verizon**

Appendix

Qualitative Usability Testing

An iterative or evaluative method to uncover insights regarding participant behavior & attitudes toward an experience in order to inform improvements. This can be run in person, remote moderated, or remote unmoderated.

+ Good for:

- + Identifying issues/pain points and opportunity areas to refine design & messaging
- + Uncovering *why* a design needs refining and *how* to improve it
- + Generating design requirements for new or refreshed experiences
- + Identifying areas for understanding scale / impact using quantitative studies

+ Not good for:

- + Uncovering deep mental models around a particular journey, product or brand
- + Tracking metrics or KPIs for statistical significance or benchmarking
- + Determining marketing communications or segment-based messaging

+ How to interpret findings:

- + Each finding reflects an insight or a pain point to promote action (maintaining a design or improving it). These should be read in full to understand the observed behavior.
- + Generally, the more frequent the feedback or issue comes up across participants, the more important it becomes
- + It takes just 5 participants to find about 85% of usability issues within a particular experience
